

## DOSE STRIP PACKAGING

Making complicated dosing regimens simple and portable

Whether your campers have one important medication to take multiple times per day or many combinations of different doses, the innovative medication packaging service of CampRx makes it simple for camp staff to administer important doses properly.

### 1. Medication Review by Doctors of Pharmacy

– all of a camper's medications are surveyed to determine sorting capabilities.

### 2. Combination

- Doses of multiple medications dispensed into one packet by time of day to be administered.\* Camps may choose to customize the dosing times by Morning, Afternoon, Evening and Bedtime, or by specific times of day for each camper as needed.

### 3. Customized Labeling of Each Dose Packet

- child's name
- date of birth
- medications enclosed
- date and time to be administered
- any special instructions

### 4. Tear Strip Packaging

- Individual dose packets are part of a larger, tear-off, medication strip package enclosed in a personalized box dispenser.

### 5. Camp Delivery

– The camp receives a box dispenser labeled for each camper. Staff simply tear open the packet and all the campers' doses for that time of day are ready to administer.

### 6. Portable Packets Available for Trips

- Waterproof, tearproof packaging makes it ideal for use on trips away from camp when medical staff may not be present.

\*Only medications in pill form can be included in the dose strip. Other medications such as inhalers, creams and liquids are dispensed and labeled separately and shipped to camp with your child's medication strip packages.

Prepackaged medication all but eliminates the risk of missed or incorrect dosing. Campers' medications are dispensed, sealed and labeled for daily dosing right at the pharmacy, saving camps many hours of gathering and organizing campers' medications.

Enjoy peace-of-mind that your campers will be safe and healthy away from home.
